

VOICE THREAD TUTORIAL

VoiceThread is an Online application that allows you to create and comment on multimedia presentations using voice, video and/or images. There is a version of this application designed specifically for educators.

(<http://21ctools.wikispaces.com/Voice+Thread>)

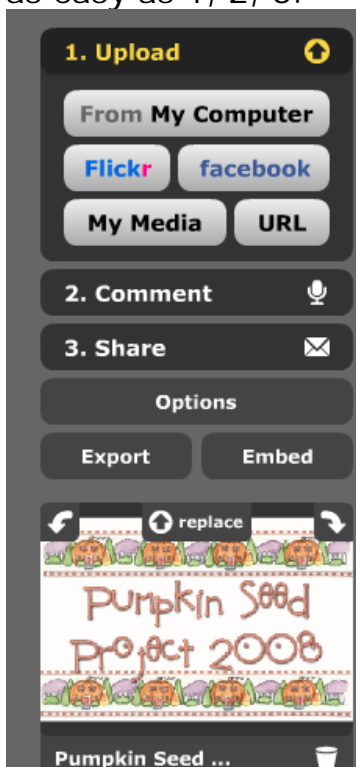

Log onto voice thread.

If you are participating in a project voice thread, you might have been provided with a LOG ON email and password.

You are also invited (and encouraged) to create your own account as well.

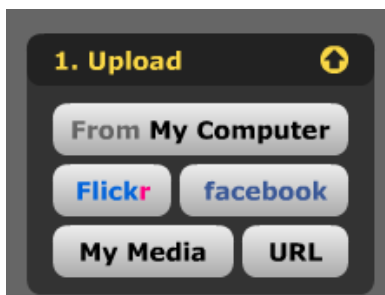

Take a glimpse at the main tool bar. Creating a voice thread truly is as easy as 1, 2, 3.

Make sure you are at the correct Voice Thread by clicking on MY VOICE & choose SHOW MINE! Select the voice thread by clicking on it.

Step One Uploading your images.

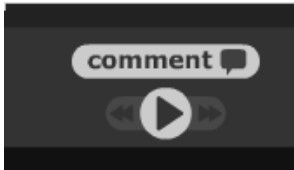

You will need to know the LOCATION (where the images are on your computer) for your pictures. I usually save mine to my desktop (for uploading from my computer.) Please do not upload any images which are NOT yours without giving proper citation for use.

You can upload more than 1 at a time by using your control key (or apple key) to select more than 1.

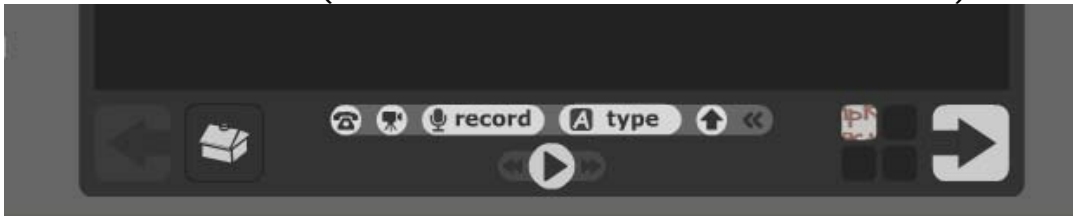

Step Two

Adding your comments

Can be either audio or text!!

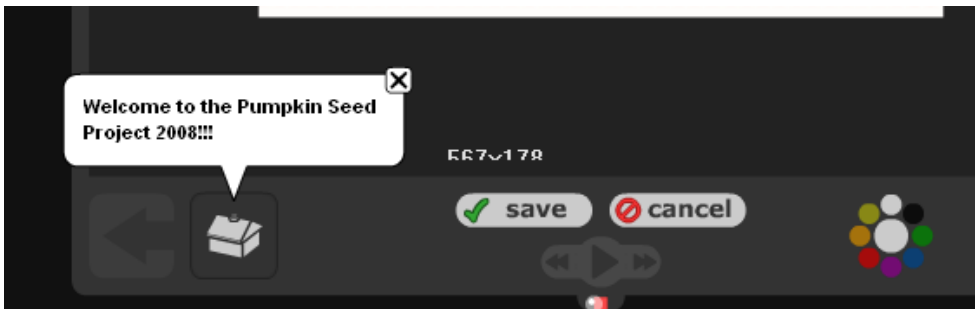

Click on COMMENT (centered underneath the main window)

Choose RECORD if you have your microphone hooked up.
Choose TYPE if you wish to add text.

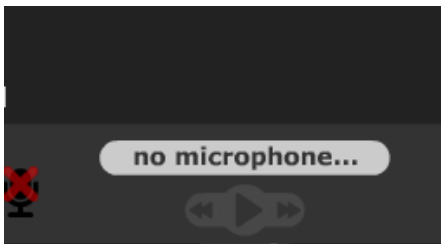

(you can also call in from your phone or add video!)

When you click on TYPE, a small window will pop up and allow you to add text, you can also choose the color of the text. Click on SAVE when you are done.

If you make a mistake, you can click on the garbage can to delete it.

If you click on record, your computer will search for the microphone. If it does NOT find it, you will not be able to record. (please check the HELP in the voice thread top right corner for a tutorial on how to set up your microphone!)

Step Three Sharing

Because our Voice Thread is already EMBEDDED into the project page (<http://www.jenuinetech.com/Projects/ps2008/ps2008voicethread.htm>) it is not necessary for you to share it with me because it updates immediately. However, if you would like to email it to yourself or perhaps your principal or friends, please feel free to do so!!

Please sign out – when you are done!!
